JGA

Your partner in metal solutions

We are passionate about what we do, making the difficult seem easy. Meeting commitments is not an option, but a habit built through mastery of technique and management. We know how to innovate and leverage our experience in every solution, service, technology, and product we offer.

When faced with a technical challenge to reduce costs, **JG Automotive** is the answer.

ABOUT US

At **JG Automotive** we are more than **250 professionals** involved with our customers, actively participating, decisively and responsibly in achieving the commitments acquired with the aim of satisfying the wishes of our customers, ensuring the correct functioning of all the gears of our company which allow us to offer them products that combine design, quality and sustainability at affordable prices, while advancing in intangible aspects such as circularity, diversity or transparency, key values that underpin a relationship of mutual trust.

Here are some of the **clients** who trust us and whom we have helped grow, building strong, long-term relationships.

GLOBAL ALLIANCE AUTOMOTIVE

In June 2002, **JG Automotive** became a Founding Partner of the world's largest network of business development and engineering service providers, creating **Global Alliance Automotive**.

GLOBAL ALLIANCE AUTOMOTIVE

- Assets in the main automotive markets.
- 19 independent local offices.
- 15 countries: America, Europe and Asia.
- 1,720 million euros.

GLOBAL REACH ALLIANCE

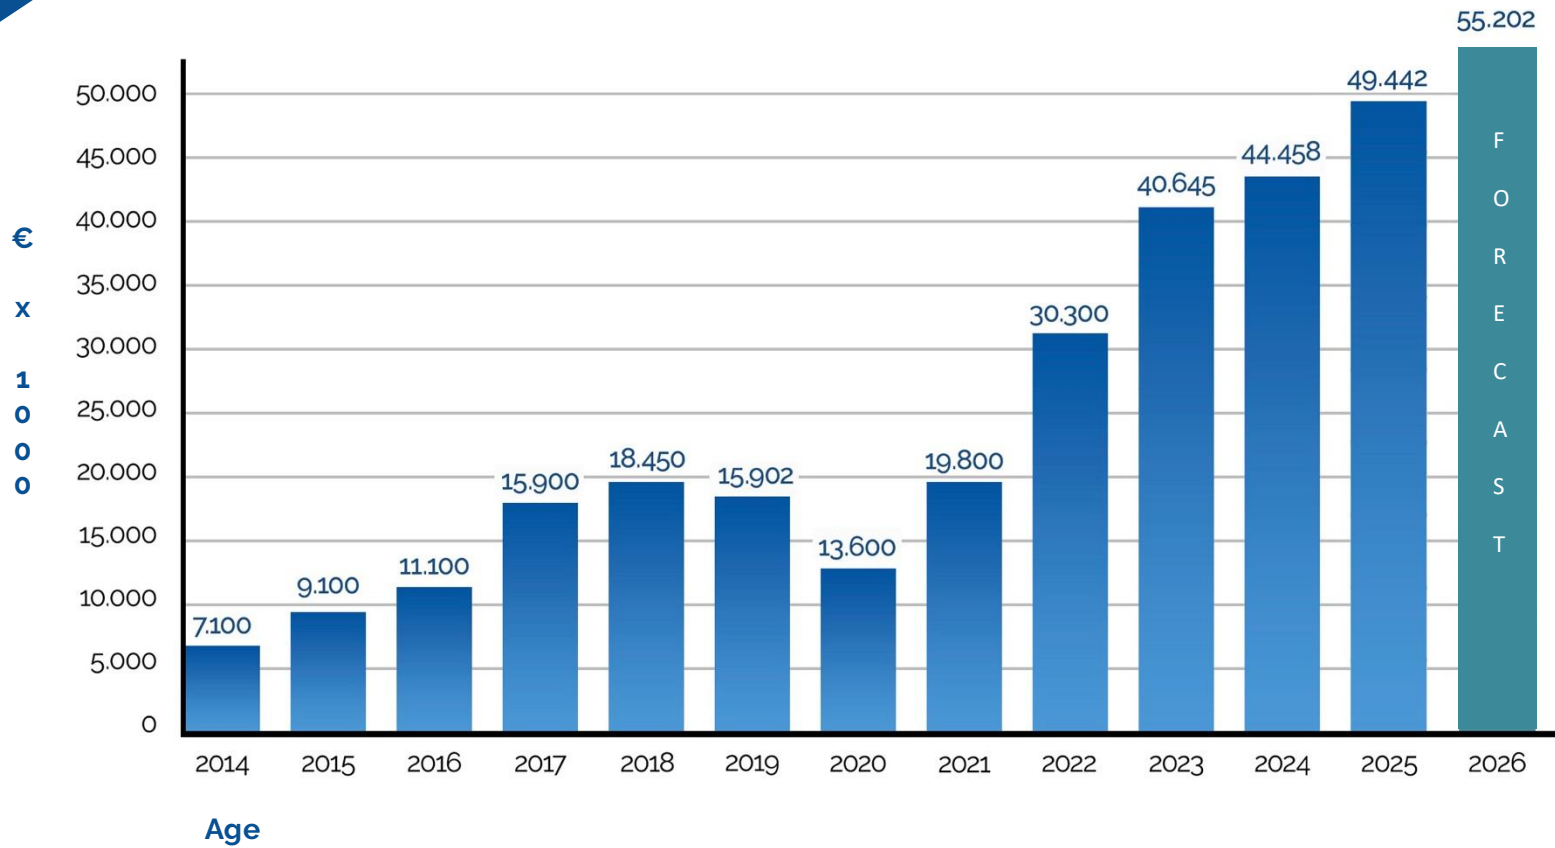

- Full-service provider.
- Global network of business development and engineering service providers.
- Access to 230 qualified engineers and specialists.
- Alert to the latest requirements, changes and trends thanks to an intimate and constant global presence.
- Impeccable relationship with the factories.

JG AUTOMOTIVE GROUP

Your partner in metal solutions

In **2021**, **JG Automotive** acquired the **Laser Mimar factory**, located in **Barcelona**, becoming a **manufacturer specializing in the automatic forming of sheet metal**.

Laser Mimar has **advanced** technology for the manufacture of metal parts, integrating **automated laser cutting**, **robotic welding**, **CNC bending**, **5-axis machining** and **industrial painting with climate control**.

In 2024, **JG Automotive** acquired **Industrias Araba** (Indaraba) in Vitoria-Gasteiz, a leader in the **CNC machining** of highly complex and critical parts for demanding sectors. We specialize in the automotive sector, focusing on medium and large production runs.

In **2025**, the Group incorporated **JG Bending & Stamping**, a **stamping workshop** located in **Zaragoza**, with additional capabilities for **tube forming** and **sheet metal fabrication**.

In **January 2026**, **JG Automotive** takes a new strategic step with the acquisition of the **JG Promec** CNC machining factory, reinforcing its **industrial capacity**, its **know-how in high-precision machining** and its positioning as a **comprehensive supplier of metal parts**.

CONSULTING

JG Automotive has established itself as a key benchmark in the supply of metal components due to its long history in the sector:

- **Process and product** engineering.
- Competitive source of **raw material**.
- Improvements in savings: **effectiveness and efficiency** of processes.
- Global Supply Chain Manager.
- Comprehensive support of **supplier reduction programs**.
- **Warehousing and logistics** services to your plant.
- Expert advisor on **cost reduction programs**.
- Sales force of **leading automotive manufacturers**.
- Exclusivity and access to **unique manufacturing methodologies**.
- Constant innovation with **Industry 4.0**.

CENTRO TÉCNICO ZARAGOZA

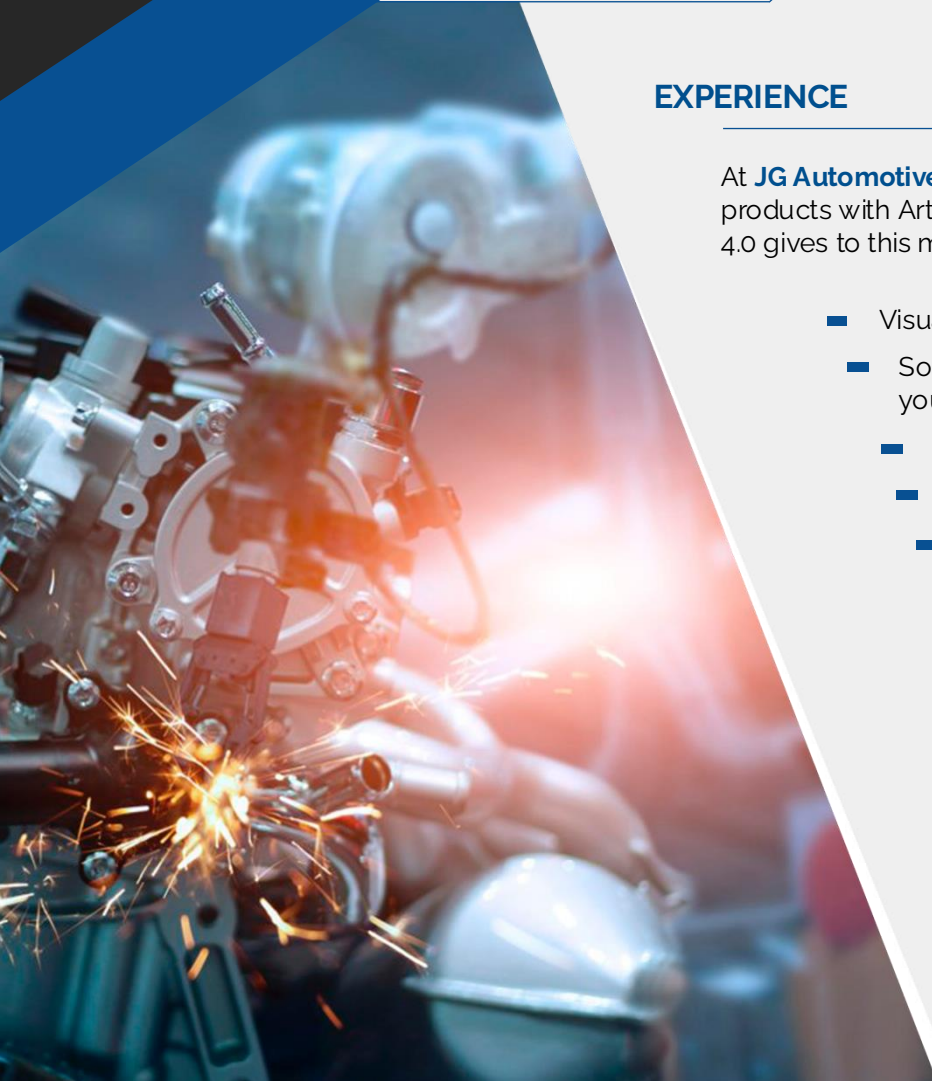

INDUSTRY 4.0

EXPERIENCE

At **JG Automotive** we combine data and digital technology to reinvent products with Artificial Intelligence. **Industry 4.0** is the name given to Industry 4.0 gives to this model by integrating engineering and digital manufacturing.

- Visual inspection system to detect quality visual defects by AI.
- Solution that increases rigidity and hardness of the surface where you apply it, reducing weight.
- System that recognizes quality and failures in welding using AI.
- Highly effective shock absorber without electronic components.
- Electrical circuits on fabric with various functions.
- Solutions for heat dissipation.
- Material forming using a pressurized liquid.
- Design and product engineering.
- Information screens on any glass surface.
- AI 3D vision that detects distances, direction, speed and type of object.
- AI with sensor-enabled vision that is capable of detecting pedestrians, traffic and any type of object, while at the same time monitoring the interior of the vehicle, its condition and that of its driver.

INDUSTRY 4.0

EXPERIENCE

- Manufacture of substitute fabrics for leather from tea remains, reducing the carbon footprint.
- AI sound integrated into the seat.
- Wood-like organic solutions.
- Highly effective shock absorber without electronic components.
- Automate emissions and environmental status control.
- Solutions for heat dissipation.
- Company that reduces the noise emitted.
- Medium volume 3D printing and high precision of plastic and metal parts, they also do machining, post-processing and 3D modeling.
- 3D printing using metallic ink.
- Manufacture of parts with recycled polymer of any horizontal size.
- Automatic electro-polisher for difficult surfaces being able to reduce personnel.

ADVANCED CO₂ EMISSIONS MANAGEMENT

At **JG Automotive**, we are committed to sustainability through innovation and environmental transparency. Within the framework of the **European Union's CBAM (Carbon Border Adjustment Mechanism)**, we have strengthened our emission control and management systems to ensure regulatory compliance and promote more responsible manufacturing.

Thanks to this advanced management at **JG Automotive** we can optimize Our environmental performance through:

- **Real-time** monitoring of CO₂ emissions.
- **Detailed and traceable** reports to meet CBAM requirements.
- **Predictive analytics** to reduce the carbon footprint throughout the supply chain
- **Easy** integration with existing systems and processes.

This approach reinforces our commitment to sustainability and to a transparent industry aligned with **European climate objectives**.

Carbon Border
Adjustment Mechanism

OUR PARTNERS

We work hand in hand **with our Partners** with the aim of developing the right product and marketing it at the perfect time. Our purpose is to create products of high value and with a great differential value.

Find out which companies are already part of the **JG Automotive** Partner network.

JG CERTIFICATIONS

JG Automotive works under the highest standards in the sector.

Our **quality certifications** endorse each process and guarantee the reliability, safety and excellence that characterizes us as trusted partners in the industry.
